

DEGIORGIO
VASSALLO
VENTURES LTD.

Dear Valued Partner,

When we established our first venture in Malta almost 10 years ago, we believed that the key to business success was creating an entrepreneurial spirit that is based on investing in the right people to grow the business. We followed this philosophy all the way through. We started our first venture, Sanondaf as we had experience in the cleaning industry and were noticing that manual cleaning did not provide the level of disinfection required as viruses, bacteria and germs reside in many hard-to-reach areas. This was the Eureka moment, from where we proceeded to take the plunge to assemble the technology and chemistry that would provide a holistic solution.

As firm believers in internationalisation, we looked outside of Malta 7 years ago and today we are represented across 5 continents servicing different markets across the world.

As a business we have a vision, that of creating a diversified group that focuses on key expertise and reputation behind the person and the brand they represent. This is how the project of building the Degiorgio Vassallo Group began – our aim was to establish a network of linked companies that provide mostly complimentary services based on clear market expertise. The Group's companies do not only share similar business objectives, but also a vision, values and partnership relations. We focus on freedom of action, entrepreneurship and excellent technical knowledge.

Today, Degiorgio Vassallo Group is not involved in the disinfection business but is a key player in various other sectors including:

- Pest Control being the representative of the largest Pest Control Company in the world – Orkin Pest Control
- Specialist Cleaning Services
- Home Automation Services

As leaders we have been lucky to have met the right people while building our Group. However, we would not have become a leading player in our business space without the trust of our customers and business partners.

Sincerely,

**Mark Vassallo &
Jason Degiorgio**
Founders

Who are we

We are fully committed to our clients and the provision of excellent, high standards, professional services in whatever we do. We combine our values with unique experience and expertise. We do not give up where others do, and we are always ready to find effective solutions. Our customers' satisfaction gives us the greatest impetus to move forward

Mission statement

As a group of companies we seek to foster entrepreneurship and invest in talented, professional individuals who have the drive to take their business to the next level. We provide the experience and dedication needed to achieve leadership in local markets and international links to drive international growth. We do this by investing in people and creating an environment which enables and empowers everyone to succeed.

It is our ambition to create a entrepreneurial group of companies which do not aspire only to being leaders in the local market but aspire to become key international players in their field of expertise.

Company vision

Our Values

We are fully committed to our clients and the provision of excellent, high standards, professional services in whatever we do. We combine our values with unique experience and expertise. We do not give up where others do, and we are always ready to find effective solutions. Our customers' satisfaction gives us the greatest impetus to move forward.

Responsibility

We take responsibility for our work and the environment in which we operate. We always look at ways to reduce our impact on the environment whilst creating effective solutions.

Commitment

We are fully committed to every project we embark on, no matter the size. We're committed to doing things right as our customers' satisfaction gives us the greatest impetus to move forward.

Effectiveness

We are ambitious and consistently strive to achieve our goals and push our boundaries. We believe that commitment and persistence are the key to success.

Quality

We believe in delivery quality effective solutions that meet the need of our customers. We believe that quality is expressed in delivering what the customer needs in professional, efficient and effective way.

Reputation

We base our reputation on the provision of optimal results to our customers, investing in qualified people and the representation of quality brands.

SANONDAF®

touch-less disinfection services

Overview

Sanondaf's touch-less disinfection solutions combine the effect of both our spraying devices and disinfectant solutions. The dual effect of both devices and disinfectants, enables the air and surface in a room to be disinfected automatically.

Our disinfectant is a patented, highly effective, oxidizing disinfectant that kills 99.99% of all hazardous germs and bacteria without posing a threat to humans, animals or plants.

SanoFog | Aerosol Disinfection.

The Fogging Device we use was developed around a heating and ionizing turbine that sprays the disinfectant liquid transforming it into a dry fog. The droplets fill the room and are drawn into every nook, crevice, and corner, reaching surfaces that regular manual cleaning and disinfecting cannot. The SanoFog assures a homogenous distribution of disinfectant on all surfaces in the room, reducing the risk of cross-contamination of infectious diseases associated with using a rag, wipe or sponge. It is also safe for use around all electronic equipment.

SanoStatic | Surface Disinfection

The Electrostatic Device we use is an electrostatic spray disinfectant system featuring a sprayer nozzle that adds an electrostatic negative charge to the disinfecting solution as it is applied so that it actually surrounds and clings to the surface it touches.

Services

SanoFlow | A/C Disinfection

SanoFlow offers comprehensive air conditioning servicing. We specialise in cleaning and disinfecting split systems, window units, ceiling cassette units.

SanoVac | Mattress & Upholstery

The SANOVAC CONCEPT safely Eliminates Dust Mites, Bacteria, Viruses, Pollen, Mold, Mildew and Fungal Spores and numerous other Harmful Contaminants found in Mattresses and Upholstered items as well as on hard, nonporous surfaces found in homes, hotels and all types of multi-bed facilities.

COMPLETE HOMECARE SYSTEM: IF YOU WANT THE BEST DEEP CLEANING SYSTEM, YOU WANT A KIRBY®

You invest a lot in your home. Help protect that investment and extend the life of your carpet, doors and furniture with the best vacuum out there: a KIRBY® system. For over 100 years, our customers have benefited from the confident clean that only Kirby can provide.

Kirby Micro Magic HEPA Filtration – “Certified HEPA Filtration” – Removes 99.97% of household dust, pollen, mites and other particles down to 0.3 microns and 99.5% down to 0.1 microns.

Services

DEHUMIDIFIERS

John Elliott's passion for innovation and engineering have made EBAC the best selling water coolers in Europe. Our most powerful dehumidifiers, the 3850e combines the latest technology and user-friendly features designed for you and your home. This 21-litre dehumidifier uses Smart Technology that automatically detects when to operate eliminating condensation, dampness, mould and odours.

AIR PURIFIERS

By using a WINIX Air-Purifier you ensure yourself of clean indoor air. Because of our powerful air purifiers, your indoor air is cleaned much faster and more often. When using a WINIX Air Purifier, you will create a healthier indoor air quality for you and Your family. WINIX air purifiers using the highest quality filters in combination with the unique WINIX PlasmaWave® technology. Our technology is cleaning your indoor air from the smallest particles (up to 0,03 micron).

ANTI MOULD TREATMENT

OXYPURE created a brand-new formula to terminate the mould once and for all!

Our range of services start from simple treatments with our eco-friendly anti-mould solutions on the surface area such as grouting, walls and furniture, to locating and fixing water leak issues, plastering and painting with the preferred emulsion for the finished paint work.

STERILIZATION OF MATTRESSES

Mattresses offer the perfect breeding ground for dust-mites, bacteria, viruses, mould and fungal spores as well as numerous other harmful contaminants found in bed mattresses. Our effective system offers deep cleaning technology for the removal of all dust and physical matter with added UV sterilisation . The mattress is then sanitized by our unique electrostatic application for long lasting protection.

Services

CARPETS

We clean all types of carpets and take pride in our restoration service for oriental and expensive handmade rugs. As part of our preventative scheme, we offer solutions on how to maintain carpets from building up with heavy dust, sand and grit that most vacuum cleaners seem to be incapable of removing nor preventing.

CURTAINS

Curtains may be one of the most dreaded jobs to have done as it usually means removing and rehanging them. OXYPURE has developed the most effective onsite cleaning service to safely remove high levels of dust found in curtains. The electrostatic spray is then used as a finishing product to kill and protect against dust mites, bacteria, viruses, mould and fungal spores and numerous other harmful contaminants.

SOFAS

Over time, upholstery begins to build up with dust to lose its colour. Our unique deep cleaning and disinfection service effectively removes and safeguards sofas and fabric upholstery from accumulation of dust and harmful microorganisms. Our shampoo cleaning methods are used as a secondary action only to remove stains, general grease and grime as well as to bring out a noticeably improved appearance.

AIR CONDITIONERS

Start feeling better...

OXYPURE's air conditioner cleaning service treats your system with an antibacterial solution to inhibit the growth of mould and bacteria, giving you up to 12 months of protection and a superiorly clean air conditioner. Air conditioner cleaning is essential, and we are your air conditioner cleaning experts.
